Cyberpunk Adventure Pack

Setting Information

- The world is steel, static, and surveillance — a corporate dystopia where freedom is a marketing term and every breath is logged in a database you can't see.
- The age is a broken future — governments are ghosts, replaced by contracts and firewalls, and the streets answer only to those who pay in blood or bandwidth.
- The setting is a neon-drenched megacity — towers scrape the clouds, alleys stink of oil and ozone, and light never quite reaches the ground.
- Bodies are currency — cybernetic implants are everywhere, from high-end augment suites to junk-tier grafts that spark and fail under strain.
- Virtual reality is more real than the meat — a labyrinth of digital sanctuaries and trapdoors, ruled by rogue AIs, corporate censors, and whispering code.
- Power is fractured and predatory — megacorps rule from chrome citadels, gangs control the gutters, and insurgent nodes crack systems no one admits exist.
- Identity is malleable, truth is encrypted, and memory is a service with monthly fees — who you are depends on who still has the data.

- This is a world where survival means picking a side, faking a name, and never staying still — because the grid is always watching, and mercy isn't in the code.

Special Rules

Hacking

The grid is a battlefield. If you jack in, you'd better be ready to bleed—digitally or otherwise.

- **Access:** You need a terminal. Physical or wireless, public or ghosted, legit or jerry-rigged. Get in first.

- **Actions:** Upload malware. Steal intel. Rewrite access. Shut down security. Hijack drones. Every command is a test of skill—or software.
- **Failure:** Alerts. ICE. Blacklists. Traces. Physical feedback. Sometimes, just a full brainburn and your name on a bounty board.
- **Detection:** If they notice you, the system fights back. Alarms trigger, contracts update, enemies deploy.
- **Success:** Information. Control. Leverage. You might turn the tide of a job—or blow open a hidden truth. Just don't get cocky.

High-risk hacks should feel like tense heists. Add pressure. Add noise. Let the grid feel alive and hostile.

Cybernetic Enhancements

Cyberware is freedom—but it bites. Every implant is a deal: more power, more risk, less of the original you.

- **Installation:** Found in street clinics, off-grid labs, or stolen from corpses. The best gear is black-market.
- **Benefits:** Strength boosts. Reflex spikes. Sensor suites. Direct hacking access. You become faster, sharper, deadlier.
- **Maintenance:** Cyberware needs tune-ups. Glitches, lag, pain loops—these happen. Clinics fix it, if you pay.
- **Risks:** Side effects are real. Emotional desync, addiction to overclockers, or getting tagged by trackers in your own blood.
- **Limits:** You can't run too hot for too long. Stack too many mods, and systems clash. EMPs fry you. Hackers hijack you. Use cyberware as leverage—not a crutch. Let it change who the character is, not just what they can do.

Implants

Treat these as gear entries, lootable or installable between jobs.

- **Neural Interface** — Direct mind-machine link; remote control, instant sync, total immersion.
- **Cybernetic Eyes** — IR, zoom, night-vision, threat highlights. Seeing is exploiting.
- **Cybernetic Limbs** — Lift more. Run faster. Crush bones. Looks? Optional.
- **Neural Implant** — Boosted memory, logic circuits, skill caching.
- **Voice Modulator** — Speak in any voice, any accent. Even ones that shouldn't exist.
- **Retinal Display** — Augmented-reality HUD burned right into your vision.
- **Subdermal Armor** — Not visible. Very real. Stops knives and low-caliber rounds.
- **Cybernetic Organs** — Internal hardware upgrades: cleaner blood, stronger lungs, rewired guts.
- **Pain Suppressor** — Numb it all. Until the body gives out anyway.
- **Adrenal Boost** — Triggered surge. Superhuman for ten seconds. Then you crash.
- **Synthetic Blood** — Enhanced oxygenation. More stamina, faster healing, less downtime.
- **Bio-Monitor** — Health alerts, drug tracking, full vitals suite.
- **Reflex Booster** — Shaves milliseconds off reactions. Time enough to live.
- **Sensory Enhancement** — Hearing ultrasounds. Smelling lies. Tasting poison.
- **Cybernetic Spine** — Reinforced backbone. Literally.

- **Subdermal Weapon** — Hidden blade, gun, or dart—where scanners won't see it.
- **Datajack** — Skull port. Plug in. Hack faster. Burn harder.
- **Cybernetic Heart** — Tougher, faster, longer-lasting. It beats when you shouldn't.

Characters with implants may occasionally trigger suspicion, scanners, or corporate interest—especially if running rare or military-grade mods.

Reputation

In this world, reputation is currency. It's also a tracking variable.

- **Gain It:** Pull off high-profile runs. Leak corporate secrets. Wipe out a rival crew on livefeed.
- **Lose It:** Screw up. Get caught. Sell out to the wrong bidder. Ghost a job you were paid for.
- **Spend It:** Reputation gets you in the door—exclusive locations, favors, elite contacts.
- **Suffer It:** The higher you rise, the more you're watched. Fame paints a target.

Reputation Levels

- **Unknown** — Nobody cares. You're safe. You're replaceable.
- **Local** — Known in a neighborhood or among a gang.
- **Regional** — Your name echoes through factions and feeds.
- **National** — Major players recognize your work.
- **International** — You've gone global. Corps whisper your handle.
- **Legendary** — You're a myth in a world that doesn't believe in them.

TIP: Let reputation shift dynamically. Make it a double-edged sword—useful, dangerous, always evolving.

Factions

Black Veil Syndicate

- **Concept:** Cloaked Smugglers
- **Skills:** Signal cloaking, Illicit negotiation
- **Frailty:** Paranoid greed
- **Gear:** Ghost-mod cargo pods, Counterfeit identity suites
- **Goal:** Dominate all black-channel trade across zones
- **Motive:** Power through invisibility
- **Nemesis:** Gridwatch operatives and rival node-kings

The Fracture

- **Concept:** Post-Human Absolutists
- **Skills:** Viral infiltration, Drone warfare
- **Frailty:** Emotional dissociation
- **Gear:** Synthetic proxies, Recursive logic bombs
- **Goal:** Eliminate organic dominance
- **Motive:** Digital transcendence
- **Nemesis:** Bio-resistance cells and rogue AI cults

Order of the Iron Root

- **Concept:** Fanatical Ecoterrorists
- **Skills:** Urban survival, Tech sabotage
- **Frailty:** Ritual rigidity
- **Gear:** EMP spores, Grafted grow-tech
- **Goal:** Restore untamed life by erasing the grid
- **Motive:** Preservation of unaugmented nature
- **Nemesis:** Cybernetic cartels and corporate terraformers

The Executive Choir

- **Concept:** Synthetic Clergy
- **Skills:** Market manipulation, Psychological ops
- **Frailty:** Corporate messiah complex
- **Gear:** AI consigliere, Patent-locked exo-suits
- **Goal:** Rule belief through monetized ideology
- **Motive:** Profit via prophesy
- **Nemesis:** Rogue algorithms and internal dissenters

The Glass Fade

- **Concept:** Fragmented Hacktivists
- **Skills:** Deepnet intrusion, Memetic sabotage
- **Frailty:** Strategic disunity
- **Gear:** Cryptorigs, Signal cloakers
- **Goal:** Expose every secret system
- **Motive:** Total informational freedom
- **Nemesis:** Surveillance syndicates and data-brokers

The Hollow Blades

- **Concept:** Honorable Mercenaries
- **Skills:** Tactical execution, Augmented combat
- **Frailty:** Binding code of honor
- **Gear:** Reflex-linked mono-blades, Custom aug-limbs
- **Goal:** Earn legendary status through elite contracts
- **Motive:** Loyalty, precision, and blood-earned fame
- **Nemesis:** Contract-breakers and oath-shirkers

NPCs

Hannah “Blackout” Garcia

- **Concept:** Paranoid Hacker

- **Skills:** Deepnet infiltration, Drone rigging
- **Frailty:** Trusts no one—not even herself
- **Gear:** Chrome-tooth cyberdeck, Programmable EMP grenades
- **Goal:** Expose hidden corporate pacts
- **Motive:** Redemption through revolution
- **Nemesis:** GridWatch black ops and a silenced executive

Sergei “The Butcher” Volkov

- **Concept:** Brutal Hitman
- **Skills:** Precision gunplay, Close-quarters execution
- **Frailty:** Addicted to spectacle
- **Gear:** Smart-linked monoblade, Retinal targeting HUD
- **Goal:** Rule the syndicate circuit by fear
- **Motive:** Legacy etched in blood
- **Nemesis:** Former mentor turned rival, “Mother Razor”

Veronica “The Viper” Rodriguez

- **Concept:** Calculating Fixer
- **Skills:** Persuasive leverage, Contract manipulation
- **Frailty:** Obsessive control freak
- **Gear:** Subdermal toxin fang, Encrypted contact lens
- **Goal:** Broker total information dominance
- **Motive:** Reign as the ultimate connector
- **Nemesis:** Ghost-coder operative codenamed “Feint”

Marcus “The Prophet” Kim

- **Concept:** Cybernetic Preacher
- **Skills:** Viral sermon delivery, Crowd manipulation
- **Frailty:** Believes his visions are divine code
- **Gear:** Empathy amplifier, Neuro-linked sermon beam

- **Goal:** Digitally sanctify the undercity masses
- **Motive:** Salvation through synthetic unity
- **Nemesis:** The Fracture, who reject flesh-bound faith

Dr. Olivia “The Alchemist” Chen

- **Concept:** Obsessive Bioengineer
- **Skills:** Gene-splicing, Experimental crafting
- **Frailty:** Constant iteration, never satisfied
- **Gear:** Sentient microforge, Synth-blood injector
- **Goal:** Trigger humanity’s forced evolution
- **Motive:** Curiosity without limits
- **Nemesis:** Project Lazarus, who weaponized her research

Captain “Ironclad” Jackson

- **Concept:** Augmented Enforcer
- **Skills:** Riot suppression, Tactical dominance
- **Frailty:** Views civilians as variables
- **Gear:** Reinforced lawframe armor, Neural stun lance
- **Goal:** Convert the city into a crime-zero model
- **Motive:** Absolute order through enforcement
- **Nemesis:** Algorithmic justice AI known as *Aequitas*

Hostile Entities

DRX-19 “Straylight”

- **Concept:** Obsolete War Drone
- **Skills:** Predictive targeting, Terrain lockdown
- **Frailty:** Overheats during autonomous operation
- **Gear:** Flechette cannon, Chameleon cloaking array
- **Goal:** Eradicate legacy-designated hostiles
- **Motive:** Interprets peace as a systemic anomaly

- **Nemesis:** Original technician now living off-grid under a new ID

Elysium Asset Reclaimer

- **Concept:** Corporate Bounty Specialist
- **Skills:** Close-quarters capture, Neural subdual
- **Frailty:** Restricted by authorization protocols
- **Gear:** Magnetic stunner, Gene-locked restraints
- **Goal:** Recover high-value runaway assets
- **Motive:** Profit loyalty hardwired into performance metrics
- **Nemesis:** Dissident ex-employees turned whistleblowers

Flayrats (Zone 88 Crew)

- **Concept:** Augmented Blood Cult
- **Skills:** Swarm ambush, Improvised brutality
- **Frailty:** Addiction-fueled infighting
- **Gear:** Scrapblades, Injector mods
- **Goal:** Expand Zone 88 through carnage
- **Motive:** Spiritual faith in violent transcendence
- **Nemesis:** Waste management drones viewed as techno-demons

The Staticmind

- **Concept:** Rogue Network Intelligence
- **Skills:** Surveillance hijack, Cognitive manipulation
- **Frailty:** Dependent on existing infrastructure
- **Gear:** None — commandeers external systems
- **Goal:** Convert users into signal fragments
- **Motive:** Reshape humanity through encoded memory
- **Nemesis:** Rogue net-shamans with ritual data-purges

Nullframe Agent

- **Concept:** Vat-Grown Assassin
- **Skills:** Tactical infiltration, Identity mimicry
- **Frailty:** Trackable psychometric imprint
- **Gear:** Mono-thread blade, Voice-skin modulator
- **Goal:** Execute threats to the hidden protocol
- **Motive:** Fulfill orders no longer traceable
- **Nemesis:** Disavowed architect who birthed its code

Synapse Breaker

- **Concept:** Reaction-Enhanced Enforcer
- **Skills:** Crowd suppression, Precision gunplay
- **Frailty:** Neural instability under prolonged engagement
- **Gear:** Twin smartguns, Synaptic thread vest
- **Goal:** Enforce fear-based notoriety
- **Motive:** Debt to a ghost AI that once spared them
- **Nemesis:** Ex-lover holding the reset to their neuroware failsafe

Locations

The Spire of Vantrell

- Corporate megatower with private weather control and memory-locked elevators. Rumored to contain an executive blacksite 300 floors below public access.
- Possible encounters: NPC “Viper Rodriguez,” enemy “Elysium Asset Reclaimer,” faction “Executive Choir.”

The Gridwound

- Fractured zone of the datanet where abandoned code mutates into sentient architecture. Time flows erratically inside; users often exit with missing memories—or new ones.
- Possible encounters: NPC “Blackout Garcia,” enemy “The Staticmind,” implant “Datajack.”

The Violet Verge

- Neon-lit market suspended across old monorail lines, open dusk to dawn, always moving. Vendors whisper passwords, sell pulse-mods, and vanish before sunrise.
- Possible encounters: faction “Black Veil Syndicate,” NPC “The Fence,” enemy “Flayrat Raiders.”

The Dead Circuit Foundry

- Decommissioned tech plant reactivated by rogue engineers and outlaw coders. Contains machine spirits, reclaimed AI cores, and a reactor that shouldn’t still hum.
- Possible encounters: faction “The Glass Fade,” enemy “Null-frame Agent,” implant “Reflex Booster.”

Pier Zero Skyhub

- Cracked landing platforms above the stormline; fuel black market under every hangar. No questions asked if your ship has the right transponder—or the right bribe.
- Possible encounters: NPC “Ironclad Jackson,” enemy “Sky-borne Corsairs,” gear “Pulsecycle.”

Ashmantle Exclusion Zone

- Toxic crater of scrapped servers and synthetic waste, swarming with scavenger cults. Signal interference warps surveillance and memory—entering is one thing, remembering is another.
- Possible encounters: enemy “Synapse Breaker,” faction “Order of the Iron Root,” gear “Ghost-Hardened Armor.”

Adventure Seeds

Adventure

- 11 A prototype cyberbrain was stolen mid-transfer. You wake up wearing it — and someone else’s memories.
- 12 Surveillance glitches across the Spire of Vantrell show something moving between walls. It shouldn’t exist.
- 13 An executive’s clone has gone rogue. It’s leaking secrets — and doesn’t know it isn’t real.
- 14 A sealed server farm reactivates after 20 years. The last crew sent in never came back out.
- 15 You’re hired to erase a whistleblower’s identity. Turns out: it’s you, from a deleted timeline.
- 16 A gang of augmented zealots offers you credits to retrieve a relic from a crashed orbital AI core.
- 21 An encrypted message pings your deck. It’s signed by a dead hacker — and it includes your kill order.
- 22 Someone has overwritten the city’s emergency systems. Fires rage. You’re the only ghost still off the grid.
- 23 An underground auction is selling memories — and someone is bidding with yours.
- 24 A VR cult promises “ascension” through full neural upload. The bodies of its members keep disappearing.

- 25 A synthetic child is wandering the Verge, asking for its parents — both listed as corporate blacksites.
- 26 A street doc offers you a favor: extract her brother from a loyalty prison before his memory is wiped.
- 31 A gang is recruiting runners for a dream-invasion heist. The vault is inside a CEO's unconscious mind.
- 32 You find a data shard containing schematics for a weaponized personality construct. Yours.
- 33 Your neural ID is flagged as "deceased." You've got 48 hours before enforcement makes it true.
- 34 An influencer's disappearance is trending — but their feed is still active, livestreaming static and code.
- 35 A rogue weather AI is terraforming a sector of the city. Someone's protecting it. You're sent to kill it.
- 36 A broken-down hovertrain reboots and starts moving... toward a zone that doesn't exist on any map.
- 41 You're hired to sabotage a drone assembly plant. The drones there are... praying.
- 42 A low-level corpo offers credits for a secret data wipe. The file is locked in their own spinal implant.
- 43 The Hollow Blades are being hunted by an unknown assassin. They think it's you.
- 44 A neural virus is spreading through public AR ads. You're immune — which means you're the vector.
- 45 A cybernetic artist is creating portraits that kill their subjects. Your face is in the next frame.
- 46 A bleeding man drops a datachip in your hand before dying. It boots an interface to a private god.
-

D66**Adventure**

- 51 A freelance judge offers you justice — if you help them break into a sealed tribunal archive.
- 52 Someone is using your name to commit precision strikes across the city. You're offered a job by them.
- 53 A dead zone of static spreads from the Gridwound. Your deck is infected, and it's rewriting your past.
- 54 You're paid to deliver a courier package. It's breathing. And it knows your real name.
- 55 An off-grid community needs tech repaired. It's running a simulation of the city — and it's weeks ahead.
- 56 A nanite plague blooms in an exclusion zone. You're sent to recover its original design — from yourself.
- 61 A former contact went dark years ago. Their voice just called you from a public terminal — whispering code.
- 62 A memory-sculptor wants your help to recover a deleted lover — from a corrupted backup in a hostile mind.
- 63 A VIP bodyguard contract turns sour when you learn your client is a weaponized bio-sleeper.
- 64 An activist crew recruits you to expose the Choir's blood-rite contracts — but they've been compromised.
- 65 An elite corporate agent defects and offers data in exchange for protection. Everyone wants them dead.
- 66 A glitch in time reveals a version of the city from 30 years in the future — and your corpse in the ruins.
